Summary

Specialized WordPress & Backend Engineer with 1+ year of production experience architecting custom PHP plugins, enterprise web applications, and scalable Java microservices. Expert in building bespoke WordPress plugin architectures using object-oriented PHP 8, custom REST APIs, WPDB schemas, and asynchronous webhook pipelines for organizational systems. Seamlessly bridges content management platforms with enterprise Java/Spring Boot backends, automated CI/CD workflows, and containerized cloud environments.

Experience

WordPress & Custom Plugin Engineer Dec 2025 – Present
In-House Engineering & Client Solutions | Indore, India

- Architected and deployed enterprise-grade, object-oriented **WordPress plugins** using **PHP 8**, integrating Action/Filter hooks, Custom Post Types (CPT), and custom admin capabilities for internal organization workflows.
- Built and exposed authenticated **WordPress REST API endpoints** and webhook receivers to securely synchronize data between WordPress and external enterprise CRM/ERP platforms.
- Engineered custom relational database tables using **$wpdb**, implementing prepared statements, query indexing, and Transients API caching to slash database load times by 35%.
- Implemented rigorous security standards across all custom modules, including WordPress nonces, data sanitization/escaping, capability checks, and secure file handling.

Spring Boot Developer Intern Mar 2025 – Sep 2025
Pankaj Sir Academy | Bangalore (On-site / Hybrid)

- Developed and maintained distributed RESTful APIs and microservices using **Spring Boot**, **Spring Cloud Gateway**, and **Eureka** service registry.
- Implemented data persistence layers with **Spring Data JPA** and **Hibernate**, connecting to MySQL and PostgreSQL databases.
- Secured microservice endpoints using **Spring Security** with **JWT-based authentication** and Role-Based Access Control (RBAC).

Projects

In-House Vendor Portal & Management System (Custom WordPress Plugin) GitHub Link
Tech Stack: WordPress Core APIs, PHP 8 (OOP), MySQL ($wpdb), REST API, JavaScript, AJAX, Webhooks

- Architected a full-featured organizational procurement portal packaged as a standalone, modular WordPress plugin without third-party page builders.
- Built dedicated role-based portals for vendors and procurement managers featuring automated document onboarding, contract tracking, and custom approval lifecycles.
- Developed normalized custom database tables with **$wpdb**, enforced CSRF defense via WordPress nonces, and implemented asynchronous AJAX form handling for instantaneous status transitions.
- Built REST API endpoints enabling external ERP microservices to retrieve approved purchase orders and vendor profiles in real time.

Skills

Web & CMS	PHP 8 (OOP), Custom WordPress Plugins, Hooks/Filters API, RESTful APIs, JavaScript (ES6+), HTML5/CSS3
Core Development	Java, Spring Boot, Spring Cloud (Gateway, Feign, Eureka), Spring Security, Hibernate, Data JPA
Databases & Cloud	MySQL ($wpdb), PostgreSQL, Redis, AWS S3, Docker, Git, Postman

Education

B.Tech in Computer Science and Engineering, Medi-Caps University, Indore — Aug 2023 – May 2025

B.Sc in Computer Science, Medi-Caps University, Indore — June 2021 – July 2023

Publications

- **KrishiDisha: Revolutionizing Agriculture with Intelligent Recommendations, Disease Detection, and Yield Prediction**
  IEEE International Conference on Engineering Innovations and Technologies (ICoEIT-2025) July 2025
- **A Review on Understanding the Patterns of Student Dropout**
  World Congress on Smart Computing (WCSC2024), published by Springer June 2024

Certifications

Spring Boot 0 to 1 (Coding Shuttle) | **Python Essentials** (Cisco) | **Core & Advanced Java** (TehnoSoft)
